Subject: RE: E4736 issues with the sleeve coupling

Harvey,
Evidently Eagle has ordered qty six of these from us... see attached sales order.

If you'd like, I can sign these deviations and attach your email below with concurrence.

Thanks,
Will

Subject: RE: E4736 issues with the sleeve coupling

Will,

Not sure who we are making these parts for? Presumably not for stock.

Yes, those sleeves should be the "D" version or whatever the call out is for them to be aluminum.

If you need it I am happy to sign off a deviation, but I would be somewhat surprised to see us making these parts since they are for 407HP and Eagle manufacturing seems to be looking after all the building of parts and I didn't think we were one of their vendors.

Let me know if you need anything else.

HS

From: William Monterroza
Sent: March-08-16 12:56 PM
To: Harvey Siemens <hsiemens@dartaero.com>
Subject: E4736 issues with the sleeve coupling

Hi Harvey,

The drawing E4736 (attached) calls out for sleeve couplings MS20819-6J/-10J on the different configurations within the drawing.

Assembly pointed out that the -6J and -10J are stainless steel couplings, and they figure that these should really be -6D and -10D sleeve couplings, which they have stock of.

I see in the Spec for MS20189 that the Code D is inactive for new design or replacement parts, and they claim to use no code or Code J or K. Seems a bit off that even though this is stated, we would put aluminum and steel together for galvanic corrosion reasons. Do you know have any opinions on what they should use?
